About the Venue

The venue of the workshop is the State Forest Research Institute, which is located about 8 kms from the Jabalpur railway station and about 22 km from the Dumna airport.

About Jabalpur

Jabalpur is situated on the banks of the holy river Narmada. It is a major administrative and educational hub with four universities of central India. The city is well connected by train, road and has daily connectivity by air from Delhi, Mumbai and Hyderabad. The city is gateway to important to wild life sanctuaries which include Kanha national park (160 kms), Bandhavgarh national park (200 kms), Panna (241 kms) and Pench (212 kms) .Other places of tourist interest are Bhedaghat, Bargi dam and Madan Mahal fort. The minimum and maximum temperature ranges from 10°C in winter to 45°C in summer.

About the Institute

The State Forest Research Institute, Jabalpur is located on the banks of river Narmada at Polipathar. The Institute (SFRI) is the first state level forestry research institute in the country which came into existence in 1963. The institute has an area of 100 ha with various experimental plots, botanical garden, seed orchards, nurseries, mist chambers and gene bank of medicinal plants. The institute has a infrastructure facilities and is well equipped for research and training along with a well furnished rest house and guest house for accommodation.

National Seminar on

Climate Change and Role of Communities for Adaptation and Mitigation

18th-19th Sep. 2017

Organized by
**State Forest Research Institute,
Jabalpur (MP)**

Sponsored by
**MP Clean Development Mechanism Agency
Urban Development & Environment Dept.
Govt. of Madhya Pradesh**

About the Seminar

Climatic change has serious implications for a number of sectors and resources, including agriculture, forest, water and other resources. Very minor changes in temperature can have major impacts on systems on which human livelihoods depend, including changes to water availability and crop productivity. The lives and livelihoods of many communities will be at risk. Rural areas are highly vulnerable to climate change, since people there depend heavily on natural resources such as local water supplies and agricultural land.

Adaptation and mitigation are complementary to each other. For example, if mitigation measures are undertaken effectively, lesser will be the impacts to which we will need to adapt. Similarly, if adaptation measures (or the degree of preparedness) are strong, lesser might be the impacts associated with any given degree of climate change.

Adaptation to climate change adjustments in human and natural systems in response to actual or expected climate stimuli or their impacts that moderate harm or exploit beneficial opportunities. The workshop aims to explore how Sustainable Development Goals (SDGs) can be achieved with rural communities playing an important role in mitigating climate change and implementing methods for control, prevention and adaptation to changing climate in surroundings.

The aim of the Seminar is to bring together researchers, conservationists, foresters, policy makers to share their experiences about climate change adaptation and mitigation

Objectives:

- Identification of role and responsibilities of communities and local institutions in climate change mitigation and adaptation.
- User friendly measures/ technologies to mitigate the impact of climate change
- Contribution of REDD+ and other mechanism for climate change, mitigation and adaptation.

Themes:

- Forests and Climate change .
- Climate change mitigation.
- Climate change adaptation.
- Role of rural communities in reducing deforestation and degradation.

Abstracts and full paper:

Papers are invited on themes identified for the seminar. Abstract not exceeding 500 words containing concise title, names and affiliations of authors neatly typed in A4 size paper in Times New Roman font size 12 throughout on or before 30th July 2017 to Dr. Jyoti Singh, Organizing Secretary through email ID: dr.jyotisingh9@yahoo.com. Hard copy of the same should be sent separately. Full length paper along with abstracts (upto 10 printed pages) in both hard and soft copies should be submitted on or before 20th Aug. 2017.

Accommodation

Participants would be accommodated in the guest house/rest house Subject to a availability of rooms

Travel assistance

Invited speakers will be reimbursed to & fro rail (AC)/air fare (economy class).

Patron

Dr. Gaurishankar Shejwar , Hon'ble Forest Minister
Shri Deepak Khandekar, Addl. Chief Secretary (Forests)

Dr. Animesha Shukla, HoFF and Principal Chief Conservator of Forests

Advisory Committee

Dr. Dharmendra Verma, Director, SFRI, Jabalpur

Dr. U. Prakasham, Director, TFRI, Jabalpur

Dr. P.K. Shukla, President, STFS Society, Jabalpur

Dr. S.D. Upadhyaya, JNKVV, Jabalpur

Shri Lokendra Thakkar, Coordinator, Climate Change Cell, EPCO, Bhopal

Dr. R.K. Pandey, Retd. Scientist

Organizing Committee

Shri O.P. Tiwari, Dy. Director

Shri S.K. Shukla, Dy. Director

Shri R. Bisen, Astd. Director

Shri S.S. Raghuvanshi, SRO

Shri Shailendra Nema

Shri Jay Prakash George

Programme Director

Dr. Dharmendra Verma

Director,

State Forest Research Institute,
Jabalpur (M.P.)

Programme Coordinator

Dr. Pratibha Bhatnagar

Climate Change Cell, SFRI, Jabalpur

Organizing Secretary

Dr. Jyoti Singh

Senior Research officer & Head

Forest Ecology and Environment Branch
